Mahmoud Shehata

Civil | Project Engineer — On-site execution & delivery

PROFILE SNAPSHOT

2025

- Luxury finishing supervision: cladding, façade coordination, and high-end details.
- Site leadership: subcontractors, materials, daily tracking, and issue closure.
- Documentation discipline: RFIs, WIRs/MIRs, approvals, and progress reporting.
- Engineering readiness: shop drawings review, clashes resolution, and structural repairs/strengthening support.

CORE VALUE

On-time, on-spec delivery

Structured delivery under real site pressure.

I translate drawings into controlled execution — sequencing works, aligning subcontractors, closing technical queries, and protecting quality through inspections and approvals.

Daily Planning · look-ahead & constraints

Quality Gates · inspections & checklists

Coordination · civil/arch/MEP interfaces

Reporting · progress & risks

KEY RESPONSIBILITIES

Site + Technical

- Manage subcontractors, sequences, and deliverables to protect milestones.
- Inspect works, prepare/check WIRs & MIRs, and track NCR closure where needed.
- Review drawings & shop drawings; raise RFIs and resolve conflicts on site.
- Quantity takeoff, BOQ coordination, material requests, and basic cost control support.
- Coordinate MEP interfaces and finishing details to avoid rework.
- Deliver weekly updates with risks, progress, and action-driven plans.

HIGHLIGHTS

What I'm known for

Finishing

High-end execution, details, and approvals

QA/QC

Inspection readiness & systematic closure

Coordination

Subcontractors + consultant alignment

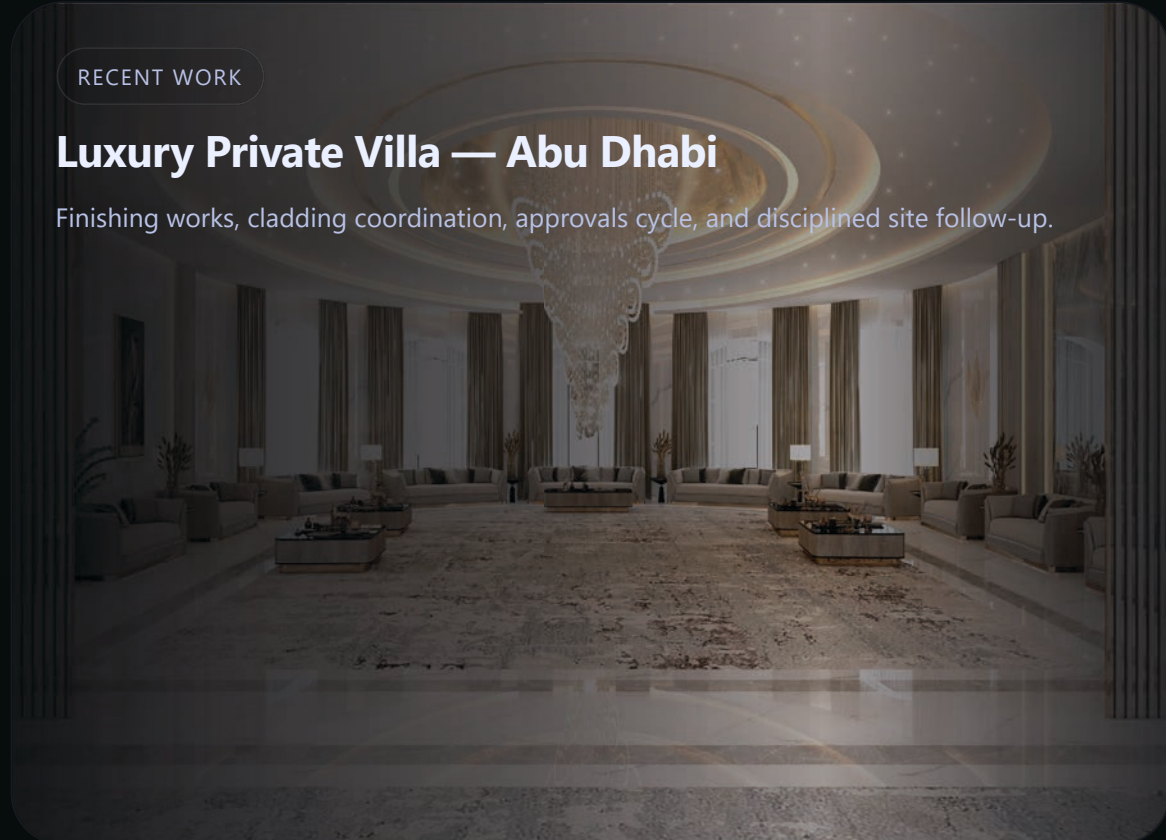

Reporting

Clear progress and action plans

RECENT WORK

Luxury Private Villa — Abu Dhabi

Finishing works, cladding coordination, approvals cycle, and disciplined site follow-up.

SITE & DELIVERY

Execution control

- Work sequencing & daily planning (look-ahead mindset)
- Subcontractor coordination & performance follow-up
- Materials requests, delivery tracking, and readiness checks
- Snagging & handover readiness (punch list closure)

QUALITY & DOCUMENTATION

No surprises

- WIR / MIR preparation, tracking, and approvals follow-up
- RFIs for clashes/clarifications + consultant coordination
- QA/QC checks aligned with specs & drawings
- Progress reporting: risks, actions, and next steps

TECHNICAL

Engineering readiness

- Shop drawings review for constructability
- Rebar checks, interface resolution, and site adjustments
- Structural repairs/strengthening support (as required)
- Quantity takeoff & BOQ coordination (Excel-based)

CURRENT

URUK Construction — Abu Dhabi

Project Engineer — Private Villa (Luxury Finishing)

High-end finishing execution, cladding coordination, approvals workflow, and multi-trade site management.

- Coordinate subcontractors across finishes and façade-related works.
- Drive approvals: samples, WIR/MIR cycles, and technical clarifications.
- Support structural repairs/strengthening works as required and coordinate MEP interfaces.

PREVIOUS

URUK Construction — Abu Dhabi

Project Engineer — Baniyas Car Showroom (≈ 50M AED)

Site delivery for a commercial flagship with complex façade, steel/RC coordination, and external works.

- Manage site execution, inspections, progress tracking, and handover readiness.
- Coordinate technical submissions and consultant requirements.
- Support procurement coordination and site reporting.

EGYPT

Makkah Constructions

Site Engineer — 36 Residential Towers (10th of Ramadan)

Multi-tower site supervision with QA/QC checks and subcontractor follow-up.

- Daily supervision and execution tracking across multiple towers.
- Quality checks, material requests, and coordination with consultant/site team.
- Support sequencing and trade interfaces to reduce rework.

KENYA

Smarmkit Company

Site Engineer — 6 Residential Towers

Field supervision with surveying support, QA/QC tracking, and daily/weekly reporting.

- Assist setting-out and on-site control with measurement checks.
- Track progress and quality observations with clear reports.
- Coordinate site execution with multiple teams and constraints.

Private Villa — Luxury Finishing

High-end finishes and coordination across cladding, interiors, approvals, and multi-trade interfaces — protecting quality and delivery confidence.

Role: Project Engineer

Focus: Finishes + Approvals

Region: UAE

Finishing-focused delivery
Cladding & premium details

Detail readiness

Execution quality

RESPONSIBILITIES

Finishing delivery

- Manage finishing subcontractors and align sequences to protect quality.
- Coordinate approvals: materials, mockups, WIR/MIR cycles and consultant feedback.
- Resolve site clashes and coordinate MEP interfaces in tight finishing zones.
- Track progress, risks, and actions to maintain handover readiness.

KEY TAKEAWAY

High-end execution

Premium finishing requires controlled sequencing and strict inspection readiness — the core of my current delivery style.

Finishing execution
Quality-focused supervision

Detail control

DELIVERY NOTE

Handover readiness

- Inspection-ready work fronts with clear closure tracking.
- Approvals-driven finishing to avoid rework.
- Coordination-first approach to protect premium details.

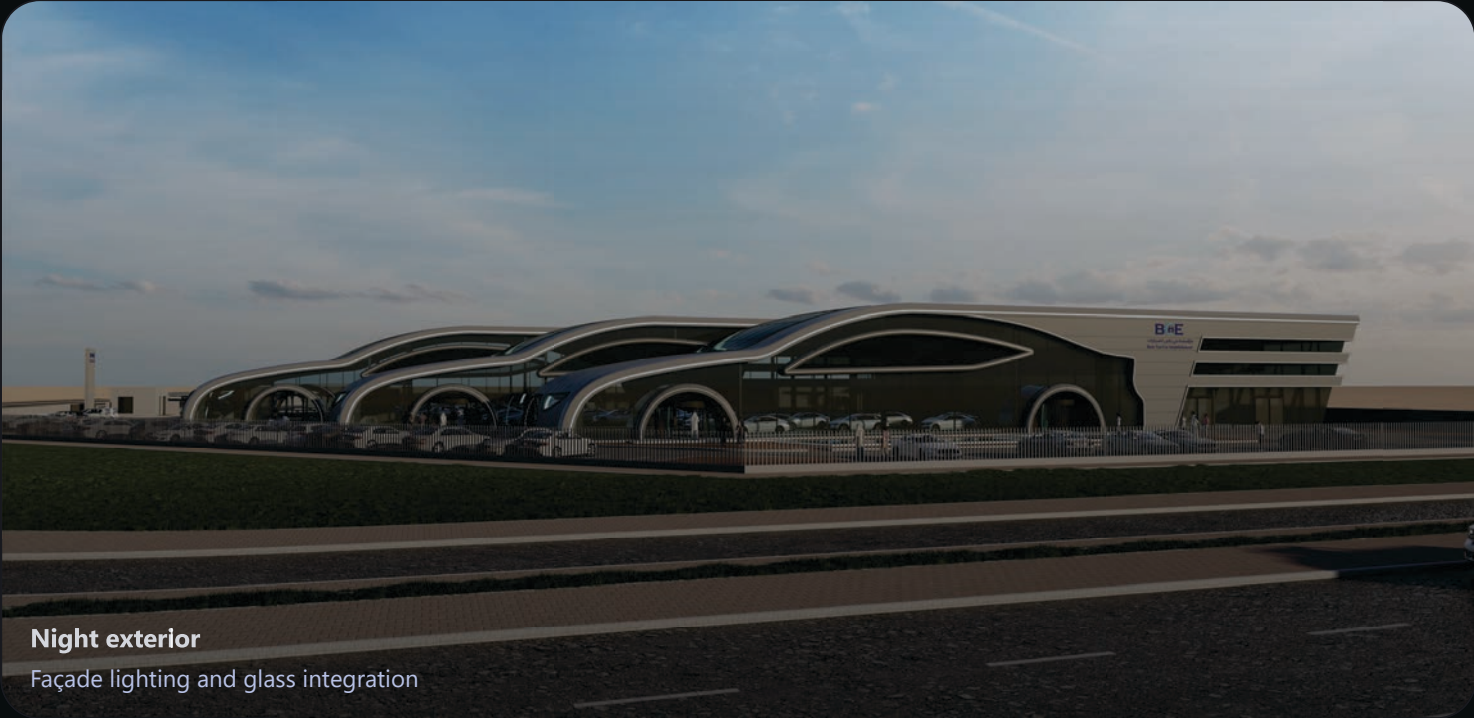

Baniyas Car Showroom (≈ 50M AED)

Commercial project delivery with steel/RC coordination, façade integration, external works, and inspection-ready execution.

Role: Project Engineer

Focus: Delivery + QA/QC

Region: UAE

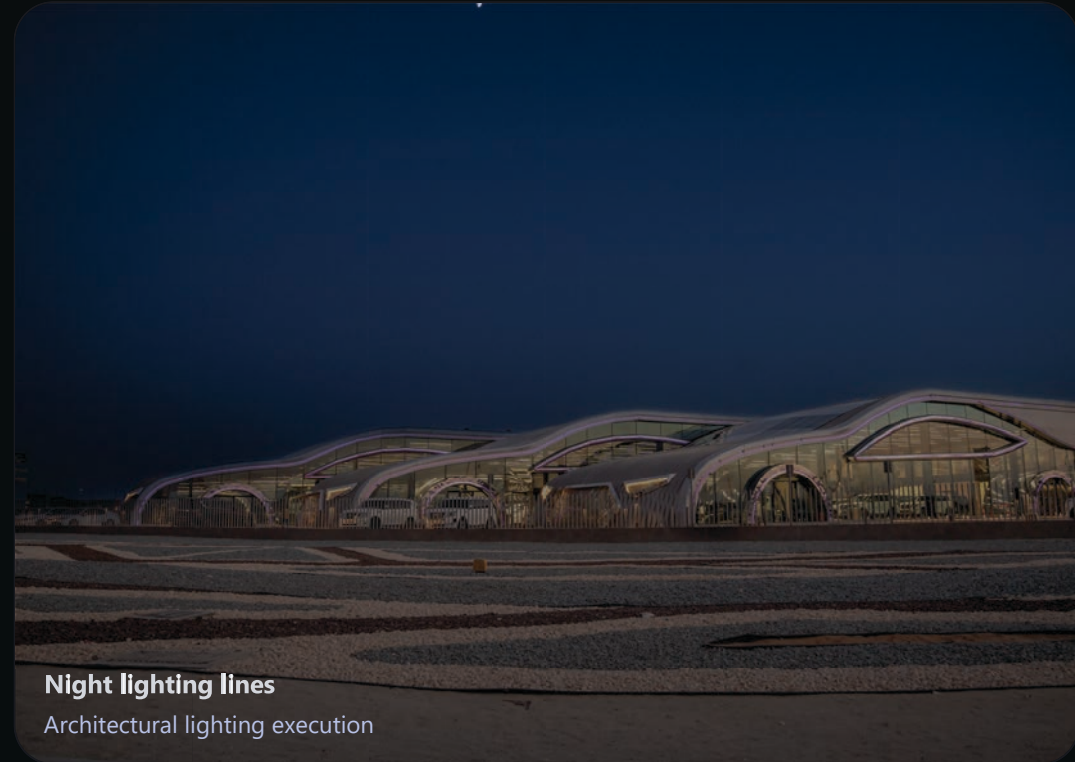

RESPONSIBILITIES	Delivery scope
<ul style="list-style-type: none">• Site management and subcontractor coordination across trades.• QA/QC checks, inspections coordination, and approvals follow-up.• Shop drawings review, RFIs, and resolving site conflicts.• BOQ support, material requests, and progress reporting.	

PROJECT HIGHLIGHTS	Impact
<ul style="list-style-type: none">• Complex façade + lighting integration readiness.• Commercial presentation quality with controlled finishes.• Clear coordination through documentation and follow-ups.

Architectural lighting execution

EXECUTION NOTES

What mattered

- Protecting finishes through sequencing and inspections.
- Maintaining alignment between drawings, approvals, and on-site outputs.
- Closing punch points and preparing for handover presentation quality.
- Managing multi-discipline interfaces (RC, steel, façade, MEP) without rework
- Controlling external works sequencing to protect finished façades and pavements
- Maintaining inspection-ready areas despite parallel trades and tight deadlines

KEY TAKEAWAY

Commercial delivery

Delivered a commercial flagship experience through disciplined coordination, inspection readiness, and finish protection.

Managed complex façade and structural interfaces while maintaining quality and schedule adherence.

Successfully managed complex systems, interfaces, and external works to achieve a high-quality, client-facing handover.

36 Residential Towers

Multi-tower supervision with QA/QC checks and subcontractor follow-up — keeping consistency across repeated units and parallel fronts.

Role: Site Engineer

Focus: Multi-front control

Region: Egypt

Residential blocks

Consistency across towers

Façade progress

Building elevation

RESPONSIBILITIES

On-site

- Daily supervision across multiple towers and teams.
- QA/QC checks and coordination for inspections and approvals.
- Material requests, site readiness, and subcontractor follow-up.
- Consultant coordination and site issue closure.

VALUE DELIVERED

What it proves

- Ability to control repeated scopes and standardize quality.
- Multi-front discipline: progress, resources, and coordination.
- Clear field reporting and action-based follow-up.

Multi-block view

Scale management across towers

Finishing progress

KEY TAKEAWAY

Consistency

Repeatable execution and quality consistency across multiple units — a core skill for large residential delivery.

6 Residential Towers

Site supervision with surveying support, QA/QC observations, and progress reporting across a multi-tower environment.

Role: Site Engineer

Focus: QA/QC + Reporting

Region: Kenya

RESPONSIBILITIES	On-site	DELIVERY NOTES	What it shows
<ul style="list-style-type: none">• Daily supervision, progress tracking, and reporting.• Assist setting-out and measurement checks to support execution accuracy.• Quality observations, corrective follow-up, and documentation.• Coordinate site requirements with teams and resolve day-to-day constraints.		<ul style="list-style-type: none">• Ability to deliver under unfamiliar conditions and new teams.• Clear reporting discipline and execution focus.• Strong field coordination to protect daily outputs.	

Execution monitoring

Daily follow-up and progress checks

Quality follow-up

KEY TAKEAWAY

Field discipline

Strong field coordination and reporting habits developed early — supporting controlled execution and consistent daily outputs.

WHAT YOU CAN EXPECT

Working style

- Clear daily control and realistic planning.
- Quality gates and inspection readiness as a default.
- Strong coordination to prevent rework and delays.
- Professional communication and documentation discipline.
